Exercise and Fitness Programs

Groups with * require an assessment before joining class

* Living Longer Living Stronger

A strength training program designed for people over the age of 50 years. Participants have an individual program designed to help reach their goals which are determined from a consultation with an Exercise Physiologist.

Tai Chi for Arthritis

Specifically designed Tai Chi program developed by the Arthritis Foundation. Research indicates people with arthritis can decrease pain levels, improve quality of life and balance.

* Vigor for Vets

An aerobic workout designed especially for older adults to improve cardiovascular health and fitness. Program is delivered in an enjoyable manner with a variety of aerobic activities including aerobics, circuits and games combined with floor and relaxation exercises.

* Smart Start

A gentle exercise program which includes weight training and light aerobic exercise. Smart Start is ideal for people wanting a less intense exercise session.

* Walking Groups

The Tuesday group is run by members of the community and held at various locations around Ballarat. The Wednesday group is a progressive group held over 10 weeks, with walks starting off shorter and less intense than the Tuesday group then increasing in difficulty as the group becomes more accustomed to walking.

* Fight Falls Program

Classes run by an Exercise Physiologist which is designed to improve balance in people who have a history of falls or who are at risk of falling. The class aims at improving independence through balance activities and strengthening of muscles that assist with balance.

* Parkinson's Exercise Group

Classes run by an Exercise Physiologist that assists in improving weaknesses associated with Parkinson's Disease including motor control and balance.

Baby Gym

A wonderful session for mums, dads or carers and their small babies (5 To 15 months) to have fun together while developing the motor skills of the small babies.

Funk Dancing

A great dance session for upper primary and secondary students. Each class involves learning a dance routine, set to popular music. No previous dance experience is required.

WAGS

An aerobic workout group designed for active older adults.
